

V1.0.2024 Key Updates: Radiation Oncology Guidelines

Please note that this is not a comprehensive list of updates, but rather are some of the more clinically impactful updates. For complete guideline updates, please refer to the diagnosis specific guideline.

- I. Kidney Cancer
 - A. Allow SBRT for Stage I kidney cancer.
- II. Oligometastases
 - A. Added lymph nodes, renal, and spine as sites of metastatic presentation.
 - B. Changed disease free interval from >1 year to >3 months as per SABR-COMET study inclusion criteria.
 - C. Removed criteria "no prior evidence of metastatic disease (cranial or extracranial)".
- III. Proton Beam Therapy
 - A. Revised entire policy.
- IV. Thymoma and Thymic Cancer
 - A. Expanded IMRT as medically necessary in the postoperative setting.
